JUST AS I
THOUGHT...

IS COM-
PATIBLE.

THAT
GIRL...

A FULL-BODY CYBORG.

Even in technologi-
cally advanced na-
tions, clinical success
is difficult to guaran-
tee... It will take some
time before this is a
common procedure.

In some
cases,
people are
just incom-
patible with
becoming a
cyborg.

It involves
harsh rehabi-
litation... And
in most cases
results in stiff
and dummy
movement.

At present,
the technol-
ogy is still de-
veloping.

It was reported
that there are
cyborgs with the
ability to learn
precise physical
manipulation.

They have
the same
abilities as
a regular
human. No,
these that
surpass
them.

*THIS IS
WHY THEIR
CURRENT
NUMBERS
ARE VERY
FEW.*

*DON'T
TELL
ME SHE
COULD
BE...*

Generally,
they are
teenagers
or even
younger.
Their personal data
were com-
piled.
BUT...

These reported sub-
jects can com-
pensate for the lack of
technological refine-
ment with genetic
efficiency and natural
ability, but their num-
bers are few in the
world currently.

BASICALLY...IT'S
AN APPLICATION
TO ALIGNMENT AND
ENHANCE THE
MOVEMENT OF
HUMANOID
ROBOTS.

THAT
THING
THAT
CAME
INSIDE
YOU
BEFORE.
